I embed with clients to architect, build, and ship production AI systems — and tie them to commercial value. I lead engineering teams & stay in the code.

\$300M

Unified data platform restarted and shipped at Nielsen/Gracenote after a five-year impasse. I supplied the revenue case.

\$40B/YR

AMPLIFY, HP's first API-based channel data exchange. Led enterprise data-strategy programs targeting \$15B in new revenue.

4 COUNTRIES

EGON built and piloted across ports, data centers, and district infrastructure for institutional asset owners.

0 → 1

Insurance vertical opened from zero at SpinF AI. Discovery, demos, Tier-1 deployment, and the engineering.

SHIPPED AND RUNNING

LYNDA IN PRODUCTION

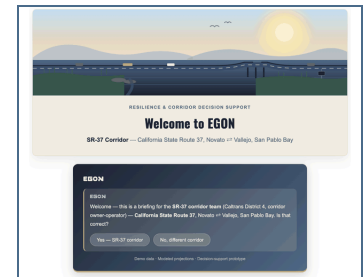

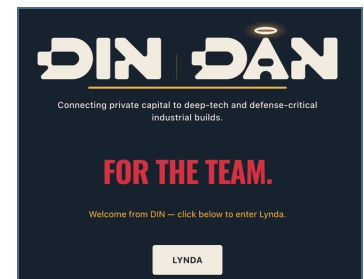

Investor-relations platform for the Defense Investor Network (DIN) — maritime industrial base, critical-mineral sovereignty, energy resilience. Live on real LP data, with a voice interface.

Graph-backed warm-introduction engine on Neo4j/Cypher — deterministic, auditable path-scoring over a relationship graph with hard safety gates, after right-sizing the data layer (PostgreSQL + recursive CTEs first; Spark rejected as over-scaled for the data volume). PII-governance core mapped to NIST AI RMF and SR 11-7: visible/redacted/hidden tiers enforced at the query layer, with a reveal-field whitelist that makes name, email, phone and notes unbreakable on a redacted row. Sealed sharing returns cryptographic receipts, never records.

EGON FOUNDER AND ARCHITECT

Multi-agent extreme-weather risk analysis for institutional asset owners and public infrastructure. Built and piloted in four countries.

Google ADK orchestration over a full A2A protocol implementation — custom message envelope, validation, and resilience layers, so one agent's faltering external call never stalls the user. 20+ federal data loaders (NOAA, FEMA, FRED, BLS, Census) fused with 45+ costed resilience measures, isolating only statistically significant improvements. Decision support, never decision-making: export-only, and it never plugs into a financial core.

WHAT I BUILD WITH

AGENTIC AI SYSTEMS

- Multi-agent orchestration (ADK, A2A, MCP)
- Deterministic agent harnesses — no LLM planner
- RAG, retrieval and grounding
- Graph-grounded output verification
- Voice and multimodal (ASR/TTS)
- Evaluation, observability, red-teaming

REGULATED-INDUSTRY ENGINEERING

- NIST AI RMF · SR 11-7 model risk
- PII governance and RBAC
- Confidential computing (TEEs)
- Signed, hash-chained audit trails
- SEC/FINRA and NAIC alignment

DATA ARCHITECTURE

- Knowledge graphs and ontologies
- Entity resolution and data fusion
- Provenance, lineage, trust scoring
- ETL at 20+ external-source scale
- Schema design and data contracts

STACK

LANGUAGES	Python	Java	TypeScript	JavaScript	SQL	Cypher	Scala		
AI & AGENTS	Claude	Google ADK	A2A	MCP	LangChain	LangGraph	SuperAGI	LlamaIndex	Deterministic harnesses
DATA	PostgreSQL	Neo4j	Elasticsearch	BigQuery	Snowflake	Spark	dbt	Airflow	
CLOUD & INFRA	GCP	Confidential Space	AWS	FastAPI	Docker	Kubernetes	Cloudflare		
VOICE	ElevenLabs	Deepgram	Groq	Chirp	Vapi	Retell AI	WebSpeech		
EVAL & GOVERNANCE	promptfoo	Arize	Weights & Biases	OpenTelemetry	Label Studio				

TRACK RECORD

2013-18	2018-21	2021-23	2023-24	2024	2025-26	2026-
Miller Strategic Design	HP	Nielsen / Gracenote	Ripley Decision Advantage	SpinF AI · BootstrapLabs	X, The Moonshot Factory	Defense Investor Network
Principal — product and engineering	Sr. PM — AMPLIFY data exchange	Director — Data Strategy	Founder-engineer — compound AI	Sales and ML engineer; product lead	AI engineer — stealth project	AI Solution Architect · EGON
						

EDUCATION

AI/ML Engineering Certificate, 2024

MS — Design, Entrepreneurship & Education

BA

ADVISORY AND AFFILIATIONS

Senior Fellow, Institute for State Effectiveness · Advisor, Smith Richardson Foundation
Volunteer, Office of Net Assessment — AI-enabled scenario-based planning
Women in AI · IEEE · AI Collective (Bay Area)

BUILT TO LAST

Founder, Rainbow School, Hyderabad, India — 2005.
Twenty-one years on, still winning awards for best Telugu-medium government school.
